Procedure for Setting the Pressure Control Range (Green Zone)

1. ① Turn the cover counterclockwise until it stops. ② Then, remove it by pulling it toward you.

2. Set the indicator (red) so that the needle is not bent and the dial plate is not damaged.

3. After completing the setting, replace the cover. Attach the cover by aligning the cutout in the cover to the groove on the top of the silver case. Turn the cover clockwise until it stops. Make sure that the matching mark on the cover is aligned with the groove on the top of the case.

G#-L Series Specific Product Precautions

Selection

⚠ Caution

1. Make sure that no direct impact or vibrations are applied to the body.
2. If operating under pressure pulsations or under high frequency operations, please contact SMC.

Mounting

⚠ Caution

1. During transport and installation, do not apply shock to the product, such as dropping. Doing so will affect its precision.
2. Regarding the installation posture, place it perpendicular to the ground, with the zero point on the reading of the pressure gauge facing down. 3. Do not install it in areas that are exposed to high temperatures or humidity, because doing so will lead to improper operation.
4. To screw in the pressure gauge, make sure to turn the gauge by placing a wrench over the square wrench flats.

If the pressure gauge is screwed in by holding it on some other area, air leakage or damage may result.
